

STRAIGHT

SLANTED

slantedSHELVING

The 55-degree angled design of these shelves allows the end tab of each folder to extend past the folder in front of it for error-free filing and fast retrieval. Slanted tiers also save valuable floor space by protruding less into a room. Additional tiers may be attached as your dealership grows. Constructed from heavy-duty 18-gauge steel.

PUTTY LT. GRAY

straightSHELVING

Our straight shelf tiers can be stacked up to eight levels high to create custom solutions for unique storage needs. All tiers feature welded dividers to keep files upright. Maximize your storage capacity using the minimum amount of space. Additional tiers may be attached at any time. Constructed from heavy-duty 18-gauge steel.
