

# Simplyfile

mailing and filing: simplified

PATENT PENDING

## i'm an envelope!

Introducing the all-new Simplyfile! It starts out flat, for the sender to fill with organized information, securely attached to an installed fastener (optional). Then it is folded and sealed, transforming it into an envelope! Once it's delivered...

## now i'm a folder!

...the recipient tears along the perforations and files the folder, documents and all. It's two products in one, making it a great, cost-effective way to share and retain important information. The Simplyfile makes sending and receiving documents simple!
